Sourcecode for Setting Up Jenkins Pipeline to Deploy Docker Swarm:

Pipeline Script

```
pipeline {
    agent any
    stages {
        stage('Initialize') {
            steps {
                echo 'Hello World'
            }
        }
        stage('Image build') {
            steps {
                echo 'Image build successfully'
            }
        }
    }
```
